EDUCATION

B.Tech – [Computer Science]

Gandhi Engineering College

SKILLS

- Python
- Checkmk
- Django
- FastAPI
- REST API Development
- PostgreSQL
- JIRA Automation
- Confluence Automation
- Git
- Docker
- Terraform
- Linux
- Shell Scripting
- Kubernetes

CERTIFICATIONS

- AWS Cloud Practitioner Certification
- NPTEL Python Certification
- NPTEL ML Certification
- NPTEL DL Certification

DevOps and Cloud Automation professional with **6+ years of experience** across DevOps engineering, software development, and IT Analyst. Strong background in **automation, monitoring, CI/CD, cloud infrastructure support, and GenAI-driven solutions**. Proven ability to lead teams, improve operational efficiency, and reduce incident response time through proactive monitoring and automation.

WORK EXPERIENCE

TCS, Hyderabad — IT Analyst

Aug 2024 – Present

- Led a **team of 5 engineers** for 6 months during leadership absence, managing daily operations and incident resolution.
- Designed and led a **GenAI-based ticket enrichment system** that automatically extracts ticket details, retrieves relevant knowledge base articles, posts solutions as ticket comments, and creates new knowledge articles upon resolution.
- Configured **new devices and Kubernetes cluster monitoring** using Checkmk.
- Developed automation to **fetch real-time server health metrics from Checkmk** and post status updates directly into JIRA tickets.
- Improved operational efficiency and reduced manual ticket analysis time.

Technologies: Python, FastAPI, Checkmk NG, K8s, PostgreSQL, Ollama, GenAI, ML, atlassian automation

TCS, Hyderabad — Developer

Mar 2020 – Aug 2024

- Automated cloud infrastructure operations to improve system reliability and operational efficiency.
- Developed a **Support Analyzer** that parses JIRA tickets, extracts server details, and automatically posts server health status in ticket.
- Created multiple automation scripts to enforce ticket priority rules and perform CRUD operations on in-house infrastructure management tools.
- Designed and built a **Django web application** to display products, components, sub-components, and assignee-wise ticket statistics via an interactive dashboard.
- Led the **migration to Checkmk**, configuring 50+ dashboards, enabling proactive team-based alerts, identifying monitoring gaps from recurring tickets, and implementing automated server reboots with transparent JIRA updates.

Technologies: Python, Django, Linux, PostgreSQL, JIRA Automation, Checkmk, Shell Scripting

TCS, Hyderabad — DevOps Engineer

June 2019 – March 2020

- Supported **3 enterprise projects** across QA, UAT, and Production environments, ensuring stable and reliable deployments.
- Managed **Git repositories**, implemented **CI/CD pipelines using Jenkins**, and handled deployments across multiple environments.
- Gained hands-on experience with **Docker fundamentals**, improving deployment stability and reducing manual intervention.

Technologies: Jenkins, Git, Puppet, Linux, Shell Scripting, Docker (Basics)
